

**Overview of catch-up pneumococcal vaccination (PCV13 and PPSV23) in pediatric solid organ transplant recipients. Please bring this to your primary care physician’s attention.**

\*Occasionally there are children who have received the PPSV23, but not the PCV13. They should still receive the PCV13 at least 8 weeks following the PPSV23.

\*\* PCV13 should not be given within 4 weeks before or after receiving the meningococcal vaccine Menactra.
