

Overview: One of the tenets of the AST OPTN Modernization fact sheet is coordination among government agencies to accomplish advances in our field. This session aims to call our field to action by illuminating the barriers of bringing innovative therapeutic development into transplant to enable us to modernize our care delivery and outcomes.

Moderators: Timothy Schroeder, PhD and Deirdre Sawinski, MD, FAST

Introduction: Nicole Turgeon, MD

Patient Testimony: Tristan Mace

Overview of the Future of Transplant Activities:

Anil Chandraker, MD, FASN, FAST, FRCP: History of Future of Transplantation

Bill Fitzsimmons, PharmD: ATC Summary

Jon Kobashigawa, MD, FAST: Future

Fireside Chat:

Topic: Understanding regulatory steps to developing new and superior therapies

Speaker: Sundaram Hariharan, MD

Topic: How do we demonstrate early efficacy in clinical trials and encourage transplant centers to participate in clinical trials?

Speaker: Roslyn Mannon, MD, FAST

Topic: Perceived limited commercial potential of the transplant market Misconceptions

Speaker: Steven Rizk, MD

Topic: Patient/Recipient voice not incorporated into development

Speaker 4: Alin Gragossian, DO and Elisa Gordon, PhD, MPH

Questions

Closing Remarks Bob Gaston, MD, FAST
